PRELIMINARY ANNOUNCEMENT

ATIS4ALL thematic network is working to establish an open, collaborative portal offering reliable information on ICT-based AT products, inclusive solutions and R&D initiatives in this field and fostering online discussion, exchange of knowledge and expertise, and sharing of information among different portal users and key actors.

The 4th ATIS4all workshop with partners and supporters will have the following objectives:
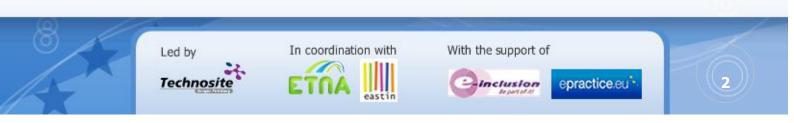

- To introduce the results coming from final deliverables of WP3 to partners and supporters.

- To demonstrate the final version of the joint prototype with ETNA TN.

- To evaluate and receive feedback of the first version of the portal, including contents, information architecture, and functionality.

- To prepare the D 4.3 "The EASTIN portal" agreeing the final details and how partners and supporters are going to contribute to finalise all sections gathering relevant contents with a more European wide approach.

- To plan the dissemination and exploitation activities for WP 4

- To identify the key actors of our community, mainly Gurus and Supporters.

- To plan the deliverables on WP4.

- To develop a roadmap and a detailed calendar for the whole ATIS4all network funding period and EASTIN 2.0 portal.
